All-

Here is January's Sentinel. February's Sentinel is not available yet. If it is like last month, they should call it March's Sentinel if they release it any later than the first week of February.

Congratulations to all for having a safe year. Lets do it again this year. It is everyone's responsibility to be safe and to watch for the safety of others and CAP assets. Safety is not just a philosophy but a mindset and culture that needs to be prevalent at all times ... not just CAP times. You need to instill this into the CAP personnel you oversee as Safety office, commanders, and staff.
